

Healthcare Planning

Creating high-quality environments that are clinically and financially sustainable.

Our healthcare planning team is led by industry experts, with a breadth of skills and experience to ensure excellence in service delivery.

Our consultants have backgrounds in architecture, medicine, finance, informatics, simulation modelling, NHS management and NHS operations. Together they make up one of the largest dedicated healthcare planning teams in the UK.

Collectively, we have delivered more than 400 projects and led complex world-class health projects around the world, including in the UK, Europe, Middle East, Australia and Canada.

We offer a comprehensive healthcare planning service including:

- Demand and capacity modelling
- Simulation modelling
- Business case development
- Evidence-based design
- Schedules of accommodation
- Equipment strategy and planning
- Design development and facility planning
- Development of patient pathways using 'Lean thinking'
- Clinical strategies and models of care
