

Sustainability

Reducing the cost of service delivery to benefit the environment and local economy.

A good sustainability strategy is linked to core business and delivers financial benefits.

Return on investment is always a critical factor for us.

We work with clients to develop solutions that embed long-term thinking, improve efficiency and reduce fixed costs.

What we do:

- Facilitate Energy Performance Contracting
- Business case development to move energy and utility projects forward
- Governance, reporting and strategic planning
- Identify and implement no cost savings opportunities
- Engage key enablers with the sustainability agenda
- Strategy building to identify cost and carbon saving opportunities
